

General Dynamics Names PacStar Reseller of Next Generation Secure Desktop Phone for the Military and Government

Portland, Ore. (May 27, 2008)—PacStar™, a technology-based provider of communications solutions to the military and government, announced today that it has entered into an agreement with General Dynamics C4 Systems, a business unit of General Dynamics, to resell the Sectéra® vIPer™ Universal Secure phone. The vIPer is a secure, end-to-end Voice over IP (VoIP) and PSTN phone system that will replace Secure Telephone Unit (STU) and Secure Terminal Equipment (STE) units currently in use by the Department of Defense, the military and its allies.

“Our customers in the government and military rely on us to provide innovative IP communications solutions that meet their stringent requirements,” said Laura Kubisiak, Vice President of Marketing, PacStar. “The Sectéra Universal vIPer phone is a cost effective, reliable replacement for the STU and STE.”

Incorporating the latest in secure desktop technology, the Sectéra vIPer phone eliminates the need for multiple desktop phones. The vIPer phone is currently compatible with VoIP networks implemented using Cisco SCCP (Skinny Call Control Protocol). Built to provide seamless communications with legacy secure phones, the secure vIPer phone is software programmable with extensive memory to easily accommodate future upgrades and functionality. Without impacting user-entered information stored in your phone’s memory (e.g., speed dial numbers), the vIPer phone can be easily upgraded for PSTN networks and SIP (Session Initiation Protocol) VoIP networks.

“We are pleased to have PacStar as a reseller of the Sectéra vIPer Phone,” said John Cole, vice president of Information Assurance for General Dynamics C4 systems. “The synergy created by this agreement will benefit Government customers migrating to Voice over IP (VoIP) who desire to implement a total Cisco IP solution, including the protection of communications classified Top Secret and below.”

About PacStar

Pacific Star Communications (PacStar™) is a leading technology-based systems integrator providing total communications solutions that empower military, federal, state and local governments, and emergency responders with reliable, interoperable communications capabilities. Our patent-pending IQ-Core™ software and hardware technology and integration/installation services provide secure, command control and communications systems for any environment.
